

PROJECT DESIGN PHASE

Date	01-11-2025
Team ID	NM2025TMID04783
Project Name	Educational Organization using ServiceNow

INTRODUCTION TO DESIGN PHASE:

The design phase for a ServiceNow project in an educational organization involves creating a detailed plan and design for the solution, outlining how it will meet the organization's needs and requirements. This phase focuses on translating ideas into a tangible design, defining solution architecture, and identifying potential issues to ensure a smooth implementation.

STEPS:

1. Creation of New Update Set

The screenshot shows the ServiceNow web interface for creating a new update set. The browser tabs include 'Project_Planning_Phase11.pdf', 'project_design_phase21.pdf', 'Personal ServiceNow develop...', and 'Create Educational Organisation...'. The URL is 'dev271869.service-now.com/now/nav/ui/classic/params/target/sys_update_set.do%3Fsys_id%3D-1%26sys_is_list%3Dtrue%26sys_target%3Dsys_update_set%26s...'. The page title is 'Update Set - Create Educational Organisation 6'. The form fields are: Name (Educational Organisation), State (In progress), Parent (empty), Release date (empty), and Description (empty). The Application is set to Global. There are 'Submit' and 'Submit and Make Current' buttons at the bottom.

Go to All >> In the filter search for Local Update set > click on New.

Enter the Details as:

Name: Educational Organisation then click Submit and Make Current

2. Table Creation:

Salesforce table:

A table is a collection of records in the database. Each record corresponds to a row in a table, and each field on a record corresponds to a column on that table. Applications use tables and records to manage data and processes. [More Info](#)

CONCLUSION OF DESIGN PHASE:

The design phase for the ServiceNow project in an educational organization concludes with a comprehensive design document that outlines the solution's architecture, configuration, and functionality. This phase sets the foundation for successful development and implementation, ensuring that the solution meets the organization's needs and requirements. With a well-designed solution, the organization can expect improved efficiency, productivity, and user experience.
